You can rest assured to buy Photochromic American Football Visors or Eye-shields with Easy Install Clips from our factory and we will offer you the best after-sale service and timely delivery.

Photochromic American Football Visors or Eye-shields with Easy Install Clips

EFFORTLESS INSTALLATION:

With an innovative two-clip system, our eye shields can be easily attached or removed from the helmet in a matter of seconds.

DURABILITY & HIGH IMPACT RESISTANCE:

Durable polycarbonate injection design engineering allows our visors to shield the eyes from high velocity hits and withstand tackle football without breaking. The 3mm thick lightweight and high impact shatterproof polycarbonate plastic offers great protection from high impact plays during the game.

FOG & SCRATCH RESISTANCE:

Scratchproof and anti-fog coating ensure clarity and durability while playing football.

COMPREHENSIVE PROTECTION:

This visor is designed with sun protection technology that safeguards the face from harmful blue light and all UVA, UVB and UVC sunrays. It eliminates the annoying glare of the sun and under the lights to control light intensity. The visor also protects your eyes from pokes, dirt, grass, and other debris during gameplay.

SUPERIOR OPTICAL CLARITY:

The optical polycarbonate material can effectively prevent visual distortion to optimize optical clarity. Eyes are visible while wearing the visor. Players can enjoy a clear view during the games.
